

MA104 Assignment

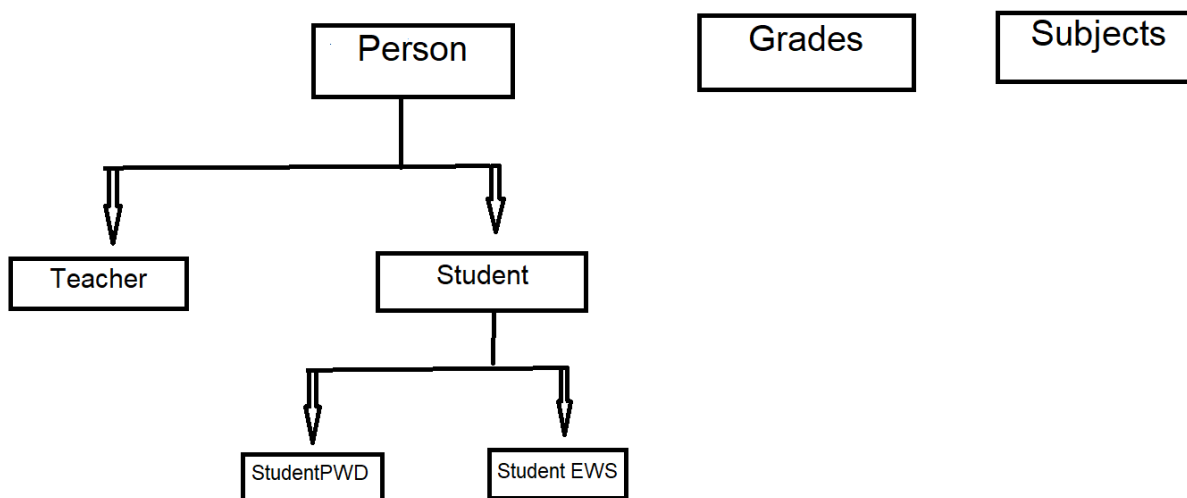

Name:-Garv .S. Kaushik

Roll NO:- 22124016

Problem Statement:

Making a Academic program in Java that can be used as a category wise report card generator for an institution.

Classes Linkage Diagram:

Functions of Classes:

Class person:

- Super class to Student and Teacher.
- Class has variables Name and Age.

Class Teacher:

- Subclass to Person.
- Has method subgrade_decider which returns PASS or FAIL for a student based on the category and the grade he got in the subject
- Has method set_subj which sets the grade for the respective subjects of a student.
- Has a method get_repo which prints the complete report card for a student.

Class Student:

- Subclass to Person.
- Category, cutoff and CPI as variables

- Has subj1, subj2, subj3, subj4 as 4 subject variables
- Has a constructor that by default assigns the category of the student to GENERAL and the cutoff of grade pointer to be 9 for each subject.
- Has methods of **setters and getters** for category, cutoff and CPI each
- Also has a method to calculate CPI.

Class StudentPWD/StudentEWS:

- These classes are subclasses of Student class.
- They have a constructor that sets the category and cutoff to their respective values for these classes using **Method Overriding**.

Class Grades:

- This class has two variables associated with it, the grade_name and pointer which denotes the grade pointer.
- The speciality of this class is that the access modifier of the pointer_variable is **private** and only has a **getter** method. Hence once the gradepointer of a grade is set using the modified constructor it cannot be changed again as it's **read only**.

Class Subject:

- Subject has 3 variables namely Subj_name, subj_grade and credits.
- Using the modified constructor the name and credits of the subject is set with the subj_grade being A by default.
- It has a **getter** method only for credit. Since the credit variable is private it makes the credit **read only** for a subject once set.
- The default grade for the subject is changed when the teacher assigns the students the grade for their respective subjects.

runfile.java Explained:

- First of all the name and the age of the teacher is set which is accessing the program to make a report card.
- Then the grades are initialized with the modified constructor taking the grade name and grade pointer as arguments.
- Since the grade pointer variable is kept private and only has a getter the code of changing the pointer once set won't work even if uncommented.
- Then the subjects and the credits of each subject are initialized.
- Note that the initialization of grades and subjects are not the inputs. It's the data that is supposed to be prefixed by the educational institution.
- Also the credits of the subjects cannot be changed once set for the same reason as grade pointers.
- Then the input of Student details such as name, age and category is taken in the system.
- Then the teacher assigns the Grade to the students for each of the concerned subjects using set_subj method. This method is available only for teacher and not for the student.
- And finally the teacher can print the report card on the screen using the get_repo method.
- At the end there is a demonstration of the subjgrade_decider method of teachers by which we can print whether a student is FAIL or PASS in a certain course.

Output of runfile.java:

```
runfile x
C:\Users\Sp0oKyJaRvIs\.jdk\openjdk-19.0.2\bin\java.exe "-javaagent:C:\Users\Sp0oKyJaRvIs\Desktop\Java\IntelliJ IDEA Community Edition 2022.3.3\lib\idea_rt.jar=64086:C:\Users\Sp0oKyJaRvIs\Desktop\Java\IntelliJ IDEA Community Edition 2022.3.3\bin" -Didea.config.path=C:\Users\Sp0oKyJaRvIs\Desktop\Java\IntelliJ IDEA Community Edition 2022.3.3\conf -Didea.copyright.notification.path=C:\Users\Sp0oKyJaRvIs\Desktop\Java\IntelliJ IDEA Community Edition 2022.3.3\copyright -Didea.home.path=C:\Users\Sp0oKyJaRvIs\Desktop\Java\IntelliJ IDEA Community Edition 2022.3.3\bin -Didea.jre.path=C:\Users\Sp0oKyJaRvIs\Desktop\Java\IntelliJ IDEA Community Edition 2022.3.3\jre -Didea.platform.prefix=JDK -Didea.vendor.id=IntelliJ -Didea.version=2022.3.3 -jar C:\Users\Sp0oKyJaRvIs\Desktop\Java\IntelliJ IDEA Community Edition 2022.3.3\bin\runfile.jar

Name : Anil
Age : 18
Category: GEN
MA101 : D || Verdict: FAIL
MA102 : A || Verdict: PASS
MA111 : A || Verdict: PASS
CS0101 : A || Verdict: PASS
CPI for this semester is : 8.451612903225808

Name : Aman
Age : 19
Category: EWS
MA101 : D || Verdict: PASS
CY101 : F || Verdict: FAIL
CS0101 : A || Verdict: PASS
CS0102 : E || Verdict: FAIL
CPI for this semester is : 8.32

Name : Arya
Age : 18
Category: PWD
MA101 : D || Verdict: PASS
CY101 : F || Verdict: FAIL
MA111 : A || Verdict: PASS
CS0102 : E || Verdict: PASS
CPI for this semester is : 7.377358490566037

Is Aman Pass or Fail in MA101? He is PASS

Process finished with exit code 0
```
